POWER
ENTERPRISES, INC
SOLAR POWER SYSTEMS

A Brilliant
Idea...

CONNECTING
THE POWER
OF THE SUN
TO YOUR HOME.

ALTERNATIVE POWER ENTERPRISES.

ANYTHING THAT
REQUIRES ELECTRICITY
CAN BE POWERED WITH
SOLAR POWER.

WHAT IS SOLAR POWER?

Photovoltaics - often called "PV" or "solar electricity", is the direct conversion of sunlight to electricity. When sunlight strikes a PV cell, electrical current and voltage are created - *silently and cleanly*. Because of this, PV is one of the most attractive alternative energy forms.

SOME OF THE APPLICATIONS FOR SOLAR (PV) POWER...

Residential homes beyond the power lines

Residential homes wishing to send renewable energy back to the utility

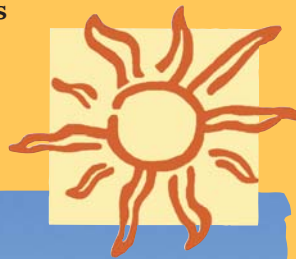

Homes and businesses needing backup power

Agricultural - water pumping for livestock or crops

Pond aeration

Cooling fans

Emergency Preparedness

* CUT YOUR ELECTRIC
BILLS 75 TO 100%

* ADD VALUE
TO YOUR HOME

* GUARD AGAINST
RISING UTILITY RATES

* PROTECT THE
ENVIRONMENT WITH
CLEAN, RENEWABLE,
SUSTAINABLE ENERGY

EXPAND YOUR THINKING

“AMERICAN ROOFTOPS CAN
BE THE PERSIAN GULF
OF SOLAR ENERGY”

— ROBERT REDFORD

Whether you live in the mountains or in town, know where your power comes from.

Utility deregulation has made it possible for home-owners to install PV and sell back to their utility that portion of power generation beyond their daily needs. In a fragile environment, PV is often the only appropriate technology.

Increasingly, PV is the power of choice for utilities, commercial business and informed individuals.

Residents across Colorado are making a commitment to using clean, renewable energy. Feel good about your home with our Off-Grid systems. Become one of our valued customers today.

* SECURITY FOR YOUR FAMILY:

Reliable PV power, available anytime, regardless of the status of the local power grid.

* SAVINGS:

Fixed costs for electricity regardless of fluctuations in the prices charged by the utility companies.

* CLEAN ENERGY:

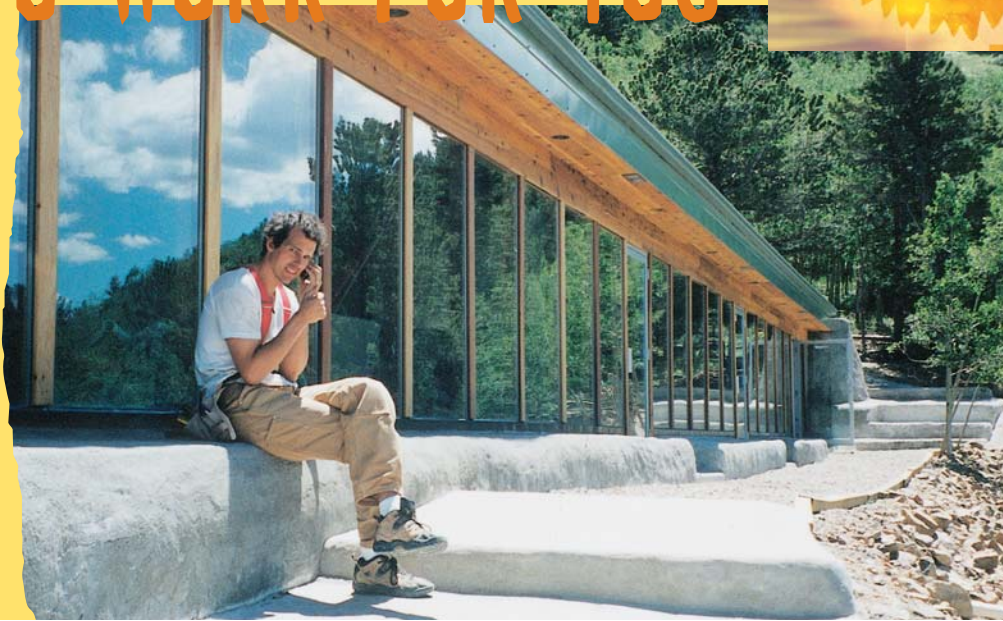

The "greenest" power available - there is no cleaner source of electricity.

* RELIABILITY:

Most PV modules we offer carry a 25 year warranty.

Purchase a solar power (PV) system from Alternative Power Enterprises...

Ridgway, Colorado

- XANTREX CERTIFIED DEALER
- CoSEIA CERTIFIED IN THE DESIGN, INSTALLATION AND SERVICE OF PV SYSTEMS IN COLORADO.

FACT: THE SUN PROVIDES ENOUGH ENERGY IN ONE SINGLE MINUTE TO SUPPLY THE ENTIRE WORLD'S ENERGY NEEDS FOR ONE YEAR.

- JULIA BUTTERFLY HILL

- Energy efficient compact fluorescent light bulbs use 1/4 the power saving you \$\$ compared to incandescent bulbs.
- Ecotherm direct vent room heaters use less energy than a central heating system and do not effect air quality.
- Bosch On-demand water heaters don't waste energy keeping a tank hot and don't run out of hot water.
- Sun-Frost and SunDanzer refrigerators use only a small amount of electricity.
- Sun-Mar Composting toilets eliminate the need for a standard septic system. Great for cabins.
- ONAN propane generators for reliable backup power.
- Solar water pumping systems for remote homes and ranches.
- Solar gate openers for security and convenience.
- Solar lighting systems beyond the power lines.
